EDUCATION

INDIAN INSTITUTE OF
INFORMATION TECHNOLOGY
DESIGN & MANUFACTURING,
KURNOOL

- Bachelor of Technology -
BTech, Computer Science and
Engineering
2022 - 2026

SKILLS

- C++
- Data Structures and Algorithm
- Python
- JavaScript
- Dart
- Flutter
- Firebase
- MERN Stack

LANGUAGES

- English (Professional)
- Hindi (Native)

PROFILE

I am a student of Computer Science & Engineering at the Indian Institute of Information Technology, Design and Manufacturing Kurnool. I am broadly interested in Web development and Mobile App development (cross platform).

PERSONAL PROJECTS

● Chatbot App

- Developed a Flutter-based chatbot app using the OpenAI API.
- The app offers real-time conversations with natural language processing, a user-friendly interface, and seamless integration of Flutter widgets.
- I led the development, including UI/UX design, API integration, and extensive testing for optimal user experience.

● Ahmad's Blog

- Developed a full-featured blog website using the MERN stack (MongoDB, Express.js, React, Node.js).
- Users can register, log in, and perform CRUD operations on blog posts.
- Features include a rich text editor, commenting system, image uploads, user authentication with JWT, pagination, and seamless front-end/back-end integration. The site is responsive and user-friendly.

● Expenses Tracker App

- Created a basic Flutter app to track expenses.
- The app allows users to input and categorize expenses, providing a simple interface for viewing and managing spending.
- Designed to be intuitive, it serves as an introductory project demonstrating fundamental Flutter functionalities in app development.

● lockboot

- My debut Flutter project integrated with Firebase, enabling real-time remote control of door locks via the internet.
- Presented as my inaugural showcase in college, it highlights my proficiency in leveraging Flutter and Firebase for IoT solutions, ensuring secure and responsive door access management.
